

# Black Shield Insulation

**BLACK SHIELD ADVANTAGES:**

**SUPERIOR INSULATION**  
Black Shield insulation consists of an ArmaFlex® insulation core that is flexible and works well in all environments.

**ULTIMATE PROTECTION**  
Durable polymers protective jacketing with a UV durable outer covering resists damage due to sunlight and other outdoor hazards, including line trimmers used for lawn maintenance - 5-year limited warranty.

**CODE COMPLIANCE**  
Meets the requirements of the International Energy Conservation Code (IECC) for protection of insulation installed outdoors. Meets ASTM B84 for Smoke and Fire (20/60). Operating Temperature Range: -70°F to +220°F ASTM D554.

**CERRO ADVANTAGE**  
Black Shield is available in various sizes and lengths for Standard and Mini-Split models. Please consult the price sheet for sizes. 100% made and assembled in the USA.

**5-Year Limited Warranty!**  
(applies to insulation only)

**cerroset**

**BLACK SHIELD**  
INSULATED LINESETS  
by CerroSet

**Ultimate Protection for a Premium Lineset!**

CerroSet Black Shield copper linesets feature high-quality thermal insulation that is moisture-resistant and UV-resistant - with an added durable protective jacket. It's the perfect insulation for the industry's highest quality linesets.

Long-lasting protection from the elements... and so much more!

## Rubber Closed Cell Insulation Advantages compared to Polyethylene Insulation.

- **Higher R-Values**
  - Rubber Insulation provides better insulation properties.
  - Reducing heat loss, increased system efficiency.
- **Superior Moisture Resistance**
  - Less chance of Formicary Corrosion, pinhole leaks, damage.
  - PE Insulation traps moisture & promotes microbial growth, which is the leading reason for Formicary Corrosion.
- **Better Durability**
  - Black Shield Insulation is resistant to tearing, & damage from UV rays.
  - Black Shield Insulation provides lasting protection for copper & life of the HVAC system.
- **Eco-Friendly**
  - Rubber insulation provides significant energy savings over its lifetime.
  - 100% recyclable at the end of its life cycle, were PE can cause environmental damage & shorten the life span of the HVAC System.
