High-Performance Return Grille Filters

Honeywell

When installed into your home's ceiling or wall return grille(s), Honeywell's High-Performance Return Grille Filters provide air filtration equivalent to typical four-inch media filters in a one-inch return grille space. The Return Grille Filter is up to 15 times more effective* than standard one-inch filters at trapping and filtering dust, as well as reducing pollen, mold spores, bacteria and other allergens passing through your HVAC system. This ensures that cleaner air is distributed throughout your home. Additionally, Return Grille Filters from Honeywell last up to three times longer than standard one-inch filters, which mean less maintenance for improved indoor air quality.

Based on initial efficiency analysis of new filters tested at 3-10 micron particles at 295 feet per minute of airflow.

High-Performance Return Grille Filter

CLEANER AIR WITH LESS EFFORT.

Longer Lasting – Three times the life of a standard one-inch filter. Only replace every 6-12 months, versus monthly or quarterly.

Superior Performance – Up to 15 times more effective and 40% efficient compared to a standard one-inch filter at reducing airborne particles like dust, mold spores and bacteria.

Helpful Reminder – The optional wireless AirWatch™ System reminds you when to change your filter. *(Sold separately)*
Perfect Fit – Fits most one-inch ceiling or wall mount return grilles.

Now Available! – 2" depth to fit tight applications.

Increases Efficiency – Filtered air puts less strain on your heating and cooling equipment, allowing it to run more efficiently.

TYPICAL HOUSEHOLD PARTICLES

FC40R air filters capture 15 times more 0.3-micron particles than typical one-inch fiberglass filters.

Bacteria
Pollen
Mold/Spore Fungi
Smoke
Dust Particles
Pet Dander
