

Comfort, control and convenience.

Meet all of your heating and cooling needs with Honeywell's exclusive RedLINK wireless technology, and achieve the perfect balance in your home at the touch of a button.

Wireless Technology

RedLINK Enabled Internet Gateway

Connects to any RedLINK-enabled thermostat to access Honeywell's Total Connect

Comfort Services; a system to remotely monitor and manage your heating and cooling system through your PC, smart phone or tablet device. **THM6000R1002**

Portable Comfort Control™

Allows you to sense and control the temperature from any room in the house.

REM5000R1001

Wireless Entry/Exit Remote

A single touch changes the temperature setting on all thermostats in your RedLINK system.

REM1000R1003

Wireless Outdoor Air Sensor

Wirelessly sends signals to display outdoor temperature and humidity on all of your RedLINK-enabled thermostats as well as the Portable Comfort Control. **C7089R1013**

Wireless Indoor Air Sensor

Changes the sensing location of the thermostat to manage the temperature and humidity in your home separately.

C7189R1004

Wireless Vent and Filter Boost Remote

A 20/40/60 minute ventilation timer that can be placed anywhere in the home where added ventilation or filtration is needed. **HVC20A1000**
