

CEILING DIFFUSERS

Architectural Plaque
T1100, A1100

T1100

STEEL

ALUMINUM

The T1100 (steel), A1100 (aluminum) diffusers consist of a stamped backpan with an integral round collar and a removable plaque face. The plaque is held in place with four brackets that positively engage into the backpan.

The architectural plaque diffusers feature a 4-way horizontal ceiling pattern effective for cooling applications where a clean ceiling appearance is required. Blank-off baffles are available as accessories to convert air patterns to 1-way, 2-way or 3-way.

The T1100, A1100 series diffusers have been carefully engineered for critical aesthetic applications while maintaining excellent performance. The plaque is made of dual thickness metal, which results in a clean appearance due to the absence of spot welds and rivets.

FEATURES

- Integral round collar for easy flex duct connections
- Plaque face is removable without the use of tools
- Double thickness center plate void of any visual spot welds or rivets
- Full-face diffuser
- Five margin styles
- Standard finish is white (WH)
- A1100 meets MRI application requirements

ACCESSORIES

- Blank-off baffles (T1100BK-steel, A1100BK-aluminum)
- Round butterfly damper (RBN,RBD)
- Round opposed blade damper (RON,ROD)
- Round radial blade damper (RRN,RRD)
- Molded R-6 insulation blanket (24x24 only)
- Optional earthquake tabs

Note: Dampers and blank-off baffles are ordered separately and shipped loose for field installation.
