SMACNA and NEW PRODUCTS

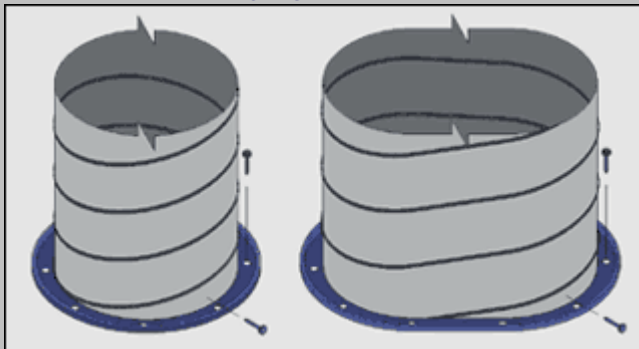

While SMACNA does not evaluate or endorse any proprietary products, they encourage the development of new HVAC products and technology, and set guidelines and standards for products to meet.

→ Dura Flange is constructed of 18 and 20 gauge material. All of our Flanges have a profile similar to that of the T-25 connector, as referenced in SMACNA 1995 edition, rendering it equivalent to SMACNA T-25 Reinforcement Rating.

Sizes	Gauge	Type of Flange
10" - 14"	18Ga.	Round
16" - 52"	20Ga.	Round
53" - & above	18Ga.	Round
All	18Ga.	Oval

→ Dura Flange has been tested from 6" Negative W.G. to 10" Positive W.G. with virtually no leakage or collapsing.
